Did you know 2011 was a record-breaking year for climate extremes, as much of the United States faced historic levels of heat, precipitation, flooding and severe weather?

Did you know in 2011 from tornadoes alone the death toll worldwide current estimate stands at about 570 tornado deaths. At least 552 deaths in the U.S., 12 in Bangladesh, 2 in South Africa, and 1 each in the Philippines, New Zealand, Russia, and Canada.

Did you know in 2011 in the US there were over 36,000 deaths from the flu, according to the CDC. Each flu season is unique, but it is estimated that, on average, approximately 5% to 20% of U.S. residents get the flu, and more than 200,000 persons are hospitalized for flu-related complications each year?

Tip of the Week –

Facilities Management

Winter Storms bring all types of challenges. One of the most overlooked details is the management of your facility after a winter storm. There are an overwhelming number of facilities that do not clean parking areas or walkways properly. This causes safety hazards for your employees, vendors and clients.

Will your facility be managed properly after a severe winter storm? Will the parking areas be cleaned so that employees can park? Will the walkways be cleared so that no one gets injured walking to and from the building?

If you own your facility, ensure that your Facility Manager has everything needed to clean the property. If necessary, consider investing in a contract with a snow removal vendor.

If you lease your facility contact your facility management company. Ask them about their winter weather cleaning policies. Ensure they have everything in place to have a safe winter.

TAMP's Disaster Recovery System (DRS™) planning solutions will provide you with the right tools to help your BCP Program. DRS is a web-based application that is easy to implement and use. Unlike competing products, DRS is straightforward and uncomplicated so that you can provide a robust solution with very little time and effort. And because it is budget friendly, it is a great value-added product that will help to increase your overall productivity.

NO RISK FREE TRIAL!

If you are interested in finding out more about DRS and how it can help you enhance your Business Continuity Program, please reply to this message for a free (no risk) product demonstration and trial. Or send an email to sales@tampsystems.com with any questions you may have. Feel free to forward this message to your business associates.
